

SilPac

Innovative Gas Handling Solutions

Two and Three Valve Gas Delivery Systems

- Two valve panel configured with regulator, high pressure isolation, and vent valve
 - Three valve panel configured with regulator, high pressure isolation valve, vent & purge valve
 - Panels are modular by design and can be offered with optional configurations
 - Designed to meet the high purity process requirements
 - All systems are fully function and leak tested with certifications
 - Our optimized manufacturing allows delivery in a fraction of usual lead times
- Please inquire about additional configurations

SilPac

Innovative Gas Handling Solutions

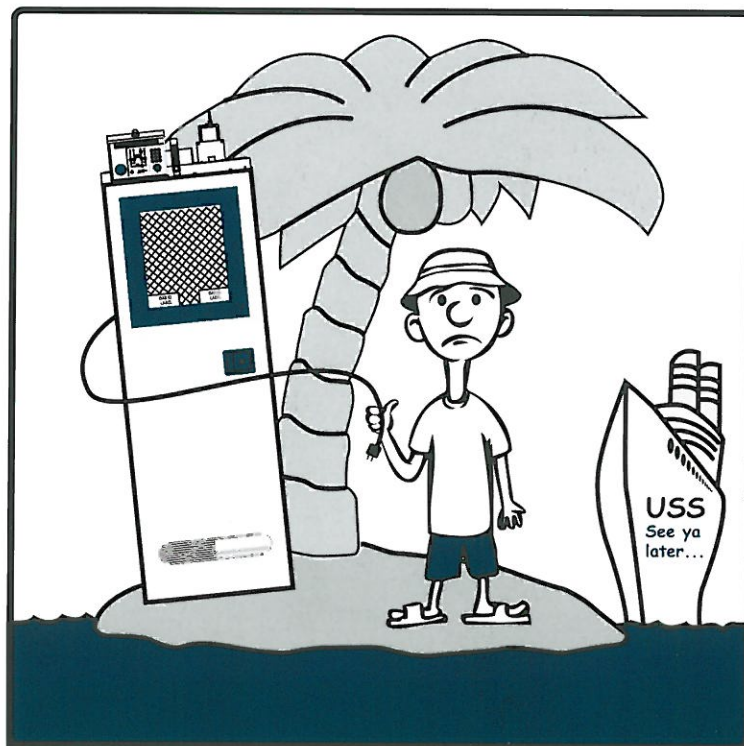

SilPac Advantage

- SilPac's primary focus is our customers. Outstanding customer service is a top priority for every employee at SilPac
- SilPac manufactures a complete range of gas panels, manifolds, and gas sticks

We provide premier gas systems support from "cradle to grave"

- Consultation to help determine the correct system for your application
- Design and build turn-key fully documented gas delivery systems
- Fabricate and assemble all gas specialty equipment in our clean room
- Perform complete analytical testing including purity, oxygen, moisture, hydrocarbon and helium leak testing
- Provide on-site system start-up and training, including gas handling techniques
- Provide follow up field service support

Don't be left on an island. . .

At SilPac, we won't leave you stranded.
