

SilPac

High Purity Regulators

1/4" thru 1 1/2" stainless steel and brass regulators for the semiconductor, life sciences, solar, and alternative fuel industry used for positive, vacuum and back pressure applications.

High Purity Valves

1/4" thru 1/2" springless diaphragm valves complete interchangeable actuators and a miniature valve body.

Electronic Control Systems

Chemical delivery equipment and related electronic control systems. Custom gas, chemical and bubbler systems, including gas cabinets, VMBs, and tool source panels.

Gauges: Stem and center back mount configurations, pipe thread and face seal connections. **Transducers:** Absolute and gauge pressure, available in many ranges. **Cylinder Scales and Displays:**

Gas Filters: Economically priced in teflon, stainless steel, and nickel mediums. Variety of end connections for any process.

Cylinder Connections: CGA and DISS components tube weld, NPT and face seal connections and economical diaphragm valves.

High Purity and Instrumentation fittings: Let-Lok compression pipe fittings, and adapters, HTC face seal fittings, and HTC mini weld fittings and adapters.

SAES Purifiers

- MicroTorr Ambient Temperature Purifiers offered for most gases in a wide range of sizes to meet flow rates up to 1,000 slpm.
- MonoTorr Heated Getter Purifiers are used for applications when Nitrogen or Methane removal is required.

Dew Point Transmitters

- Chilled mirror hygrometers, relative humidity sensors, process moisture analyzers, hydrocarbon dew point analyzers, moisture in hydrocarbon liquid analyzers and oxygen analyzers
